Prepare yourself for the challenges of tomorrow

The Doctor of Clinical Dentistry (Prosthodontics) course at the UWA Dental School equips you with the skills needed to succeed in a global and diverse environment. The training program seamlessly blends classic and modern philosophies and technologies, under the guidance of some of the field’s best specialists.

The three-year program provides dentists with the opportunity to specialise in prosthodontics in teaching, clinical and laboratory facilities equipped with state-of-the-art technologies. The program involves didactic teaching, weekly seminars, journal club and clinics, combined with a supervised research project. You’ll gain clinical training with experienced specialists in prosthodontics with excellent opportunities for interdisciplinary management in orthodontics, periodontics, endodontics and oral and maxillofacial surgery.

Our staff members, including Associate Professor Bob Hotinski, Dr Ian Lander, Dr Poh Hun Loh, Dr John Payne and Dr Michelle Huang, have many years’ experience in academic, public and private practice nationally and internationally.

Apply at studyat.uwa.edu.au/postgraduate/apply before 31 June 2017 for mid-year (July 2018) commencement.
