

Wendy Gill

The School of Dentistry has shaped my life in many ways. Not only in my professional training as a dentist and periodontist, but it has also given me the opportunity to travel and lecture to help dentists understand what we can achieve with contemporary periodontal treatment for our patients.

Also, just as importantly, the School has given me many long term friendships which were formed in my undergraduate and postgraduate student days. I'm not sure I would have made it through dentistry without these friendships.

Students, a small piece of advice - the more continuing education you do, the more involvement you will have with the profession, the more you will enjoy your career.

Good luck!
