

DR TIM HODGSON

AJ HERMAN FELLOWSHIP LECTURE

**“Morbidity and mortality resulting from oral disease and dentistry:
potential associations with systems far far away.....”**

Thursday 11 May 2017 5.30pm

**McCusker Auditorium, Harry Perkins Institute of Medical Research
6 Verdun Street, Nedlands WA 6009**

The School of Dentistry at the University of Western Australia is delighted to host Dr Tim Hodgson as the 2017 AJ Herman Fellowship Lecturer.

Dr Tim Hodgson is a consultant in Oral Medicine, Honorary Senior Lecturer and Clinical Director at the Eastman Dental Hospital University College London Hospitals Foundation NHS Trust.

He obtained Membership of the Royal College of Physicians (UK) in 1998 following 30 months on the St. Bartholomew's Royal London Medical rotation followed by a Fellowship in Dental Surgery of the Royal College of Surgeons of England by examination in the same year. He was appointed specialist registrar in Oral Medicine at the Eastman in 1999 and subsequently spent further periods in Malawi, Africa studying HHV8 and CMV transmission. He was registered as a specialist in Oral Medicine in 2003.

Tim has been awarded 5 Clinical Excellence award points by University College London Hospitals (UCLH) during his 11 year consultant appointment. He has 80 citations in peer reviewed journals. His 30 original papers focus on the oral manifestations of HIV infection in both the UK and Africa, HHV8 and CMV transmission in Africa, therapeutic interventions for oral mucosal disease and patient centred outcome measures. More recently his research publication have focused on oral health economics. He has published 19 reviews and 11 continuing professional development articles on medicine for dentists or oral medicine topics.

Tim contributed to the Medical Emergencies section in Medical Problems in Dentistry 6th edition. Within the World Workshop of Oral Medicine he has championed international collaboration in oral research and the involvement of trainees in various working groups by competitive entry.

Dr Hodgson will be speaking on the topic:

“Morbidity and mortality resulting from oral disease and dentistry: potential associations with systems far far away.....”

Overview of the topic:

Oral disease can kill or adversely affect quality of life. Undertaking dentistry is associated with risk that in the majority of cases is mitigated and leads to successful outcomes.

There is increasing evidence that oral microbes may impact on the body at distant sites and result in serious illness. This lecture explores how oral disease and the microflora have impact beyond the oral cavity and how this impact can be reduced by appropriate management strategies.

Please register your attendance with the event coordinator:

Jane Burnell, RSVP mandatory at events-dent - OHCWA by 5.00pm Friday 28th of April 2017.

Light refreshments will be served from 5.30pm with the lecture to commence at 6.30pm.

This is an excellent, complimentary continuing education event brought to you by the University of Western Australia, School of Dentistry and the ADAWA as part of the WA Dental CPD joint initiative.
